About me

Vocational software developer, and tech lover, I enjoy acquiring new skills both for my personal and professional lives. Methodical, disciplined and thorough. I like teamwork and paradigm changes. Started as self-taught programmer, which made me a Clean Code lover once I learned what proper software engineering was.

Skills

*Years of experience from 0 to 5.

+ JS, C, C++, Python, etc.

Work experience

- 2018-now** Backend, integrations and API developer On4u Global Services
eCommerce development on Magento and Salesforce-CC with custom integrations, middleware, API development & employee training.
- 2018-2018** Java Developer Axpe Consulting
Java application development for the Basque Country's Department of Justice.
- 2016-2018** President Magna SIS Junior Company
Management, leadership & software development.
- 2015-2016** Partner Magna SIS Junior Company
Web application development & client relations.

Education

- 2012-2017** College education UPV/EHU
Software Engineering Degree - Specialization in Software

Languages

- Spanish Native
- Euskera Native, Euskararen Gaitasun Agiria (EGA)
- English Cambridge English: Advanced (CAE)

- 2013** IV RITSI State Congress at Donostia-San Sebastián

Side-Projects

- C++ & Qt** Extended Metadata Manager for VLC
Degree thesis, graded 10/10.
- Django** Roommate
Internship at Magna SIS.

Career expectations

I'm looking forward to working on an environment that allows me to keep on honing my skills on a daily basis. A place where I can continue to do new things throughout my career. An organization that understands that software is my passion, and that offers career paths that don't make me part from the engineering side to fully commit to the management one.

Misc.

Driving license (B) and car.

Interests

- Cooking.
- Gardening (traditional & hydroponic).
- Filmmaking.
- Games, both digital and tabletop.
- New skill acquirement, from DIY wood-working to soft skills.
